WELCOME TO AVERILL HOUSE

A purpose-built care home specialising in residential dementia and nursing dementia care for up to 48 residents, Averill House is located in Newton Heath, just three miles from the centre of Manchester.

Averill House has a peaceful, homely environment where those living with dementia can feel secure, supported, and valued.

We prioritise person-centred care, considering each individual's unique needs and preferences while building meaningful relationships. Personalised care plans consider each resident's likes and dislikes, medical needs and more, and we work closely with residents and their loved ones to create a routine that feels personal, meaningful and purposeful. Our experienced team focus on offering structure and support, protecting dignity and promoting independence wherever possible.

FACILITIES AND LIFESTYLE

In addition to our comfortable ensuite bedrooms, residents can enjoy time in our sitting rooms, dedicated activities room, or our hair salon. With two dining areas, mealtimes not only bring delicious and nutritious food, but also an opportunity for socialising and celebration, making every mealtime an enjoyable experience.

Residents are entertained by a full timetable of activities and community events to encourage connection and engagement, in addition to enjoying excursions in our specially adapted minibus.

Every aspect of our home is designed to bring comfort, reassurance, and familiarity to our residents.

We are proud to deliver care with kindness, and create an inclusive, family atmosphere and a space that feels like a home away from home.

We look forward to welcoming you
