

# Our Aim

EncyCare aims to provide person centred care to Service Users. We provide and maintain first class care service. We promote the Service User's independence, protect their interests and respect their privacy and dignity. We believe that we can make a difference by providing high quality care and support you need. We believe that choosing the right care is a huge decision and would make sure our clients get the best possible care in the comfort of their home. We assign dedicated trained staff solely to you, having the same smiling happy face on every visit. We aspire to build up a strong and lasting relationship with our clients.

## Our Services

### Live in Care

At Ency Care, our 24 hour live in care programme allows for reassuring care in the comfort and security of the service user's home. This is the best affordable and alternative way to residential home and with EncyCare you will be in safe hands

### Domiciliary Care

We provide domiciliary care to service users who require additional support with activities like househelp, personal care, shopping, companionship and any other activity that promotes their independence and quality of life.

### Respite Care

Respite care is a temporary care for the service user when their regular carer is not available. Also it can be used as part of recovery after surgery or illness or accident.

### Alzheimers & Dementia Care

A change of routine and environment can be very daunting for someone who's living with dementia. That's why more families than ever are turning to home care rather than residential care, so their loved one can stay in the place they know and love instead of nursing homes.
