MILLENNIUM CARE

Millennium Care is a family-run, B Corp-accredited care home provider with five homes in the North West and over three decades of sector experience.

With a non-pharmacological approach to care, Millennium combine a range of proven methods to deliver the very best care. From expert staff in unique roles to a strong emphasis on nature, nutrition-led dining, and intergenerational care, residents are given every opportunity to thrive. The award-winning provider prides itself on innovation and outstanding person-centred care that allows residents to age with vibrancy.

Recognition for this commitment is clear. In 2024, Langtree's sister home Worthington Lake was named one of the Top 20 care homes in the UK by carehome.co.uk. The following year, in 2025, Lakeside was listed among Lottie's Top 100 care homes, and Millennium Care itself was recognised as one of Lottie's Top 10 Small Care Home Providers.

LANGTREE CARE HOME

Langtree offers specialist dementia care, as well as residential and respite support. Nestled within a beautiful lakeside estate, the newly built home completes the Standish Care Village, alongside Worthington Lake and Lakeside Care Home.

TYPES OF CARE —

RESPITE

Respite care is a great short term option for both the resident and their primary carer. Creating peace of mind when plans change.

01

02

RESIDENTIAL

Residential care provides accommodation and personal care services for individuals who need assistance with daily living activities.

DEMENTIA

Dementia care provides specialised support for those living with dementia, helping to maintain a quality of life and managing symptoms.

03

HOME FROM HOME

Langtree has been thoughtfully designed to provide all the comforts of home. From domestic-style kitchens and countryside features to cosy fireside lounges and a games room complete with a pool table, every detail has been carefully considered.

With floors dedicated to the Wainwrights, Beatrix Potter, and William Wordsworth, not only are they easy on the eye, but they're conversation starters.

The home promotes calmness and comfort, and is the result of careful collaboration of specialists in architecture, health and interior design. Visit yourself and you will be amazed by the home's attention to detail.

We believe that the design of an environment plays a vital therapeutic role for people living with dementia. That's why Langtree has been created not to feel like a hotel or an institution — but a true home.

STANDISH CARE VILLAGE

The Standish Care Village is a unique setting in the North West, providing a continuity of care like no other in the region which creates a home for life.

Catering for respite, residential, nursing, and dementia care, those who move into a home within the Village have the security to know they will always have a home, and the relationships they create will continue to flourish under the same Millennium Care ethos.

All homes within the Village, Langtree, Lakeside and Worthington Lake, have private access to a local lake nestled within the Douglas Valley. Specialised staff support the daily needs of the residents and include a Music Ambassador and an Occupational Therapist.

The Village is centred around community, not only the strong connections and shared learning between the homes, but also the connection to the surrounding communities.

WHAT MAKES US DIFFERENT?

HOUSEHOLD MODEL

The building's architecture has been thoughtfully designed based on evidence-backed principles, ensuring that those who live with us do so in small clusters so they can profit from the environment's powerful but subtle therapeutic benefits.

This enables us to adopt a household model of care, with small group living to reduce stress, open-plan spaces that support independent wayfinding, and social areas centred around the dining experience because we believe the kitchen is often the heart of the home.

SETTING & TECHNOLOGY

Langtree utilises the latest in technologies to implement the very best care for residents, starting with MargoAI! The machine-assisted resource by Care Control aims to make care more efficient, allowing staff to focus on their relationships and providing personal care to the residents.

The location of the home ensures that those who live with us are connected to nature and its seasons, bringing serendipity and spontaneity to individual, communal and social interactions. We encourage residents to bring their wellies, a rain jacket, umbrella and a sunhat!

FOOD

Our food offering is as homely as it is wholesome. Through a deep understanding of ingredients and their alignment with gut and cognitive health, our vision is to create a daily dining experience that tastes as good as it makes you feel.

This journey starts with our skilled Head, Sous and Commis Chefs carefully selecting all of our food ensuring it is fresh and sourced locally then through seasonally designed menus, a relaxed and none institutional approach to dining and ample opportunities for those who live and visit us to snack, graze and enjoy the pleasure and delight of food as a social activity.

THERAPIES

01

ARTS

Each floor features a piano for spontaneous music with a music and art therapy suite overlooking the garden. Our in-house Music Ambassador, specially trained by the Manchester Camerata, offers a unique approach to dementia therapy.

02

WELLNESS

The home's Lifestyle & Enrichment Coordinator's get to know the residents, creating tailored sessions and activities to encourage movement, socialising, positivity and enjoyment.

03

FITNESS & MOVEMENT

A specially equipped in-house gym ensures all who live at Langtree are supported by regular movement. A perfect combination of physiotherapy and fitness, joining the mind and body in unison.

The Group's Occupational Therapist plays a vital role in supporting residents' independence, safety and quality of life. Improving mobility makes a huge impact on those with dementia needs.

04

NATURE

Studies have shown that access to green spaces and natural views helps people live longer, healthier, and happier lives. The home overlooks open fields, offering views of migrating birds, changing tree colours, and stunning sunsets, encouraging positive risk-taking in the outdoors; whatever the season.
