# Caring

## *Our range of care services*

### *Residential Care*

Some people make the decision to move into a care home because they want companionship and the everyday chores of running a house have become overwhelming, whilst others need more assistance with the daily activities of life. Whatever your needs, our team is there to care for and support you.

We devise a dedicated care plan addressing all aspects of your life, the choices you have made and the way in which you want your care delivered.

Claridge Place uses a state of the art electronic medication administration system. This helps to achieve the accurate delivery of medication, at a time that suits you and your general physician.

### *Memory Care*

A little extra support is available for those experiencing some memory loss, or those who are living with the early stages of dementia.

Our dedicated team will assist you in deciding the most ideal environment for you to be supported in.

Reminiscence, our memory floor, comprises of beautifully appointed suites, welcoming communal areas, games, a crafts area, a hairdressing salon and a treatment room.

Residents are welcome to enjoy a film in our cinema, relax in our sensory garden and venture out on trips in our minibus.

## *Assisted Living*

Whilst 24-hour support is available as standard, it is not our wish to diminish the independence of those who prefer to take care of themselves.

All of our assisted living suites contain kitchenettes, which are suitable for people who are assessed as requiring lower levels of care.

Living at Claridge Place provides the reassurance of having a friendly team of caring individuals on hand, 24 hours a day, as and when required.

*“Claridge Place  
is an absolutely  
stunning care home.

# *Suites and Living Choices*

## *The Terraces*

Most of the large, beautifully decorated suites on our ground floor benefit from patio doors leading out to an impressive courtyard area, whilst others are enhanced with large windows that positively fill the room with light.

Suites are furnished with large wardrobes, bedside tables, comfortable seating, telephone and television, with room for more furniture if desired.

There are some interconnecting rooms, suitable for couples or friends and every suite has its own practical wet room.

## *Reminiscence*

The suites in Reminiscence, situated on the first floor, are a mixture of soft and hard flooring, and divan and profiling beds.

Each suite has its own practical wet room and, on this floor too, there are a selection of interconnecting suites, suitable for couples or friends.

All suites have a large television, comfortable seating and plenty of space for belongings in the wardrobe and bedside tables.

## *The Penthouse*

The suites on The Penthouse floor are substantially larger, some over forty square metres, and can comfortably accommodate couples.

This space is designed for more independent living; benefitting from a kitchenette, dining area, lounge and separate sleeping area.

All Penthouse suites have a practical wet room, telephone and television. This floor also has a bar area, for enjoying a sociable evening drink with friends and family.
